Blautherm matt black columns

Matt black, the finish of the latest trends with maximum resistance and durability. The matt black Blautherm shower columns by Ramon Soler ® have an immediate delivery time of just 10 days

As we have been seeing for some time, the timeless elegance of black is on the rise in the most contemporary bathrooms. Black is the colour that has always been associated with unostentatious luxury and the utmost elegance and sophistication.

Matt black Blautherm shower column by Ramon Soler ®

That is why Ramon Soler® is not lagging behind and is presenting the new matt black Blautherm thermostatic shower columns, which combine design, top performance and an unbeatable price.

Immediate delivery

Among their strengths, their efficient delivery deserves a mention. The brand works constantly to offer the best pre-sales and after-sales service. It therefore optimises its lead times as far as possible, and can offer immediate availability of the matt black Blautherm columns. In just 10 working days you can enjoy the latest-trend shower systems in your bathroom.

Maximum resistance

The matt black finish from Ramon Soler® offers maximum durability and resistance, which is essential for daily use: in the salt spray test, the matt black finish from Ramon Soler® is ten times superior to chrome. The guarantee of the highest quality is an essential condition for Ramon Soler® and, together with design, is of vital importance to all its customers, and above all to the hotel sector, which has specific requirements regarding water saving as well as safety and health. The brand is therefore clear that its shower systems must offer not only a refined, designer aesthetic, but also a set of technical features that make the whole product ideal for residential and hotel projects. The matt black finish of the Blautherm shower column is achieved using the most advanced electrostatic technology over galvanised metal, which provides extra resistance and durability.

Matt black Blautherm shower column by Ramon Soler®

Dual position

The new matt black Blautherm shower columns are available in fixed or extendable formats; this telescopic system allows the column to be extended from 880 to 1460mm. In this way the large shower can be adjusted to suit both the space and the user, offering total ergonomics.

Water saving

For the brand, sustainability is one of its most important values, which is why the Blautherm shower columns are also sustainable, saving water without any loss of comfort for the user.

Advanced technology

The matt black Blautherm Premium thermostatic shower columns have a temperature limiting system that lets users choose the exact temperature they want at any given moment, without experiencing variations even if the tap is opened and closed or the flow is changed. They also incorporate the cooltouch system, a built-in technology that keeps the tap always warm to the touch.

The shower column also has the hotblock system which, should the cold water supply be interrupted, prevents high-temperature water from coming out. In other words, it is a product that increases safety in the bathroom by preventing possible burns.

Large-format shower head

The shower heads of the Blautherm Premium thermostatic shower columns have a diameter of 300mm, a large format that delivers water in an enveloping rainfall, offering maximum comfort for the user. They also have flexible silicone nozzles, thanks to which limescale and impurities come away easily, even by rubbing with the fingers.

Multifunction handset

These large showers have a multifunction handset, which lets you choose the type of water outlet from three functions with different intensities. This offers a massage session in your own shower.

Perfect value for money

Also worth highlighting is the unbeatable value for money of the Blautherm shower columns, which makes them an absolutely attractive product for a market that is more demanding every day and needs more affordable, stylish products backed by leading brands such as Ramon Soler®.

With these matt black Blautherm Premium bathroom columns, Ramon Soler® offers the ultimate in design and comfort. Installers, architects, interior designers and consumers alike can experience design and top quality in the most sophisticated bathrooms, and so enjoy an unbeatable product within everyone's reach. Once again, this reflects its constant evolution and its efforts and commitment to offering its customers designer, competitive and high-quality products. To complete the range, you can choose matt black single-lever shower columns, with maximum durability, water saving and unbeatable design.

SPECIFICATIONS

MANUFACTURER	Industrias Ramon Soler
MODEL	Blautherm
DESIGN	In-house team
FINISHES	Chrome and matt black

TECHNOLOGY

S2 WATER SAVING

50% of the flow is supplied. This limit can be exceeded by opening the tap to its maximum flow if you wish.

TERMOSTOP

Thermostatic taps have a temperature limiting system that shows the user the limit for efficient use, from 38° to 42°C. This system limits the hot water temperature by means of a stop on the rotation of the handwheel, which can be overridden simply by pressing a button.

HOTBLOCK

In the event of a sudden failure of the cold water supply, our thermostatic mixer has a system that automatically blocks the high-temperature outlet, which could otherwise burn the user.

The SENSITIVITY of the thermostatic tap has been carefully studied so that we can comfortably regulate the desired temperature: a slight pressure on the button plus a turn of the temperature control handwheel is enough to raise it, whenever desired, above the set temperature (38 °C). In addition, Ramon Soler's 1700T thermostatic cartridges react in less than 1 second to variations in temperature and flow, maintaining the requested temperature.

COOLTOUCH

The thermostatic tap always stays warm to the touch, to avoid the risk of burns.

ANTICAL

Our shower heads have flexible silicone nozzles, thanks to which limescale and impurities come away easily, even by rubbing with the fingers. Ramon Soler® uses top-quality, wear-resistant nozzles, so that the shower head lasts better and works 100% reliably. In the long term, good maintenance prevents technical problems.

ERGONOMICS

The ergonomic design of our taps makes them easy for anyone to use.

DURABILITY

Our taps stand out for their great resistance, as all their external components subject to wear are metal, which ensures great durability over time.
