Matt Black Blautherm Set

Ramon Soler® now presents the best concealed shower set in a matt black finish. The matt black Blautherm KIT comprises a 2-way concealed single-lever mixer + a 240mm-diameter round shower head with wall arm + a handset that includes a wall bracket with water connection

Ramon Soler®'s commitment to offering its customers competitive, long-lasting products is evident in all its new launches. Yet once again it surprises us by launching a new set in a matt black finish, with a concealed shower mixer (single-lever version), a 240 mm-diameter round shower head for wall installation, and a handset with a wall bracket; a proposal that combines quality and functionality with aesthetics, meeting the demand of the latest interior design trends. It does so while maintaining one of its main goals: to design and produce quality, well-designed taps within everyone's reach.

The matt black finish, a design on trend

Trends in architecture and interior design are once again focusing on black, which never goes out of fashion and is now a must-have in the most contemporary bathrooms. Black is the colour that has always been associated with elegance, sobriety, unostentatious luxury and the utmost sophistication. Now, in a matt finish, it is the latest trend in the most avant-garde bathrooms. The Blautherm Kit by Ramon Soler® had already won us over with its exquisite design, but this time it convinces us again with its new matt black finish, with which it aims to conquer the most exclusive bathrooms, a finish as elegant as it is avant-garde, betting on the latest trends. In terms of design, the new Blautherm Kit in single-lever version has a star feature: its matt black finish, produced through an electrostatic coating process over galvanised metal that provides extra resistance and durability, preventing the oxidation and corrosion that humidity or even environmental pollution can cause on metal. For Ramon Soler®, quality is the highest priority, so it does not use conventional paint but relies on advanced technology techniques, backed by its own R&D&I team, which guarantee state-of-the-art designer products with maximum resistance for daily use.

As for its aesthetics, the concealed plates are an ultra-thin 2mm thick, which allows a precise,

millimetre-perfect fit to the wall with no visible screws, making it a minimalist tap so polished that its quality and elegance can be seen at a glance. In addition, the plate comes in a rectangular format with rounded corners and harmonious proportions, together with the temperature and flow selection controls, characterised by a perfect combination of straight and sinuous lines, which makes it easy to match with the rest of the interior design elements as well as giving the tap excellent ergonomics. The two-way set features a round wall-mounted shower head with a diameter of 240mm.

SHOWER SYSTEM

Maximum precision and constant water distribution through each of the nozzles, guaranteeing uniform spray. It guarantees a considerable saving in water consumption (30%), while providing a more comfortable shower.

Anti-limescale

The shower heads have flexible silicone nozzles, thanks to which limescale and impurities come away easily, even by rubbing with the fingers. Ramon Soler® uses top-quality, wear-resistant nozzles, so that the shower head lasts better and works 100% reliably. In the long term, good maintenance prevents technical problems. In addition, the Blautherm KIT 941502RP240NM includes a handset with three types of water outlet: CHAMPAGNE (bubbling drops of water that have a relaxing effect), MASSAGE (intense jets of water that stimulate and give the body an invigorating sensation) and RAIN (a fine spray of water to enjoy an extraordinary and pleasant rainfall).

Technology and innovation

The concealed single-lever tap in this shower set is an element that, despite being easy to install and requiring minimal maintenance, still incorporates the latest technologies to guarantee maximum safety and comfort in the bathroom.

Convenience for the installer

The different sets in the Blautherm series, one of Ramon Soler®'s most competitive offerings, are designed for the installer's convenience, as all the elements needed for installation are in a single box. A kit that avoids having to carry different boxes of taps and/or necessary parts such as hoses, showers, etc. It therefore helps the installer make a quick, efficient, convenient, quality purchase and carry out a simple installation. In addition, the brand makes audiovisual support material for installation and maintenance available to all users. The content is clear and entertaining, and is available on its official website and on all of Ramon Soler's social media. It is undoubtedly a visual

manual that both the installer and the end customer can view whenever they wish, from different online platforms.
