Chromotherapy in your bathroom with ramonsoler

RELED570 circular ceiling shower head with chromotherapy

The brand offers a large circular shower head with chromotherapy. Chromotherapy is a therapy concept for harmonising body and mind based on energy stimuli generated through colours. Each colour conveys different sensations and therefore has the capacity to influence our emotions and, in turn, our mood and our psychological and physical wellbeing. This is what we call colour psychology. Ramon Soler® incorporates an innovative LED system in its most sophisticated XXL ceiling shower heads, combining a wide range of light tones that we can choose from during our chromotherapy session in the shower. The colour of the light we choose matters, according to our tastes and needs at the time, because depending on the colour range we use, we will enjoy one set of benefits or another.

RELED570 shower head with chromotherapy by Ramon Soler®

RELED570 shower head with chromotherapy by Ramon Soler®

One of the shower heads with chromotherapy launched by Ramon Soler® is the circular RELED570 shower head, 570 mm in diameter, ceiling-recessed with a rain outlet, a fine spray of water for an extraordinary and pleasant rainfall. Best of all, it has a built-in enveloping halo of light that will make our shower the best moment of the day. The shower head is made of stainless steel and also includes a push-button control, recessed into the wall, which is used to activate the chromotherapy and choose the desired colour of light.

Turning on the water requires the installation of a concealed tap, which can be either a single-lever mixer or a thermostatic mixer. At Ramon Soler® they are constantly evolving, and quality has been their main commitment since 1890. Quality is not just about producing reliable, functional products; it must be perceptible at a glance and create highly positive sensory experiences. They also have an efficient After-Sales Service that demonstrates their commitment to service and responsibility towards the customer.

SYSTEMS

DURABILITY. Our shower heads stand out for their great resistance, since all their external components subject to wear are metal, which ensures great durability over time.

SHOWER SYSTEM. A system for shower heads and hand showers that ensures perfect water distribution through each nozzle. This system guarantees a considerable saving in water consumption (30%), while providing a more comfortable shower. SHOWER SYSTEM offers maximum precision and constant water distribution through each of the nozzles, ensuring uniform spraying.

ANTI-LIMESCALE. Our shower heads have flexible silicone nozzles, thanks to which limescale and impurities come away easily, even by rubbing with your fingers. Ramon Soler® uses top-quality, wear-resistant nozzles, so the shower head lasts longer and works 100% reliably. In the long run, good maintenance prevents technical problems.
