Outdoor cascade shower

RCEXT ultra-flat stainless steel shower head, with water delivered in an abundant waterfall.

With the arrival of summer, it is common to enjoy the good weather in outdoor areas such as gardens or terraces. The heat and longer days offer more opportunities to have fun with friends and family. But above all, what you feel like is cooling off and enjoying the fresh air.

RCEXT ultra-flat shower head, waterfall outlet, by Ramon Soler®

Swimming pools should have a shower around them for hygiene purposes, to remove traces of sweat or dirt before diving into the water. Using it after swimming is also necessary to remove traces of chlorine or other chemicals that protect the pool water, in which the user has previously bathed. The RCEXT shower head has another purpose, which is to cool off while sunbathing, in case the person does not feel the need to swim in the pool but still wants to beat the heat directly and quickly.

RCEXT ultra-flat shower head, waterfall outlet, by Ramon Soler®

Ramon Soler® presents an exclusive and beautiful solution that lets you connect with nature by feeling an abundant waterfall cascading over your body. This wonderful shower head transports us mentally to a natural setting, free from city noise, where the sound of water conveys a sense of freshness and optimism. The new RCEXT shower head by Ramon Soler® is an ideal solution for outdoors, as it offers the benefits of an outdoor spa, and is ideal for both public and private installations. This RCEXT shower head delivers a fall identical to that experienced by water in nature, helping to combat stress and promote good humour. Its avant-garde, exclusive design adds style to the space in which it is placed. It is ideal for outdoor use as it is highly durable, thanks to its stainless steel construction and special outdoor treatment, which provides maximum durability, withstanding large temperature changes and rainfall, and is even suitable for coastal areas with high salinity.

Ultra-flat shower head

At a thickness of just 2mm, it makes the piece a spectacular design that is at once slender and elegant. The shower head, built into the wall, takes the form of a thin leaf that fits perfectly with a minimalist design.

RCEXT ultra-flat shower head, waterfall outlet, by Ramon Soler®

RCEXT is a wonderful proposal from Ramon Soler® that provides unique value by combining comfort and elegance in a novel and original product, moving away from conventional designs. RCEXT by Ramon Soler® is a real luxury within our reach and a great opportunity to create a relaxation area outdoors, thanks to its exquisite design conceived for one's own well-being.

The RCEXT waterfall shower head measures 380 x 350mm and has a flow rate of 20 litres/minute at 3 bar.
