Elegance and technology within your reach

Elegance and technology within your reach

The timeless elegance of black is on the rise in the most up-to-date bathrooms. Black is the colour that has always been associated with a luxury that is not ostentatious and with the utmost elegance and sophistication. The matt black finish gives bathroom tapware the most avant-garde, on-trend design. That is why Ramon Soler® is not lagging behind and presents the new Blautherm thermostatic shower column in a matt black finish, which combines design, top performance and an unbeatable price.

Blautherm thermostatic shower column, matt black finish, by Ramon Soler ®

This shower column stands out both for its finish, which provides incomparable luxury, and for its technology and performance, as it is a thermostatic tap that combines functionality, ergonomics, comfort and safety in use. The matt black finish of the Blautherm shower column has been achieved

using the most advanced electrostatic-on-galvanised technology, which provides extra strength and durability, up to 3 times more than a chrome finish. At Ramon Soler®, quality is the highest priority, and for this reason it does not use conventional paint, but much more advanced techniques that offer maximum resistance for daily use. In addition, the Blautherm Premium shower column in matt black has a temperature-limiting system that allows the user to choose the exact temperature they want at any time, without experiencing variations even if the tap is opened and closed or the flow is changed. This model also has the HOTBLOCK system which, should the cold water supply be interrupted, prevents high-temperature water from coming out. In other words, it is a piece that increases safety in the bathroom by avoiding possible burns. And finally, it has flexible silicone nozzles, thanks to which limescale and impurities come off easily, even by rubbing with the fingers. With this Blautherm Premium bathroom column in matt black, Ramon Soler® sets out to win over architects, interior designers and industry professionals by being installed in the most sophisticated bathrooms, thus offering an unbeatable product within everyone's reach. Once again, its constant evolution and effort and concern to offer design-led, competitive and high-quality products to its customers.

Blautherm thermostatic shower column, matt black finish, by Ramon Soler ®

SPECIFICATIONS

MANUFACTURER	Industrias Ramon Soler
MODEL	Blautherm (Ref. 945402RP240NM)
DESIGN	In-house team
FEATURES	1701T thermostatic cartridge + 4000 flow control diverter

TECHNOLOGY

S2 WATER SAVING

50% of the flow is supplied. This limit can be exceeded by opening the tap to its maximum flow if desired.

TERMOSTOP

Thermostatic taps have a temperature-limiting system that indicates to the user the efficient-use temperature limit of 38° to 42°C. This system limits the hot water temperature by means of a handwheel turn stop, which can be overridden simply by pressing a button.

HOTBLOCK

In the event of a sudden cold water supply failure, our thermostatic mixer has a system that automatically blocks the high-temperature outlet, which could cause burns to the user.

The SENSITIVITY of the thermostatic tap has been carefully studied so that it allows us to comfortably adjust the desired temperature: a light press of the button plus a turn of the temperature control handwheel is enough to increase it, whenever desired, above the set temperature (38 °C). In addition, Ramon Soler 1700T thermostatic cartridges react in less than 1 second to variations in temperature and flow, maintaining the requested temperature.

ANTI-LIMESCALE

Our shower heads have flexible silicone nozzles, thanks to which limescale and impurities come off easily, even by rubbing with the fingers. Ramon Soler® uses top-quality, wear-resistant nozzles, so that the shower head lasts better and its operation is 100% reliable. In the long run, good maintenance prevents technical issues.

ERGONOMICS

The ergonomic design of our taps makes them easy for anyone to use.

DURABILITY

Our tap stands out for its great strength, since all its external components subject to wear are made of metal, ensuring excellent durability over time.
