ramonsoler 3829 stainless steel kitchen tap

A kitchen tap with refined lines, the perfect balance between design, functionality and high quality. Made of solid stainless steel with a tall swivel spout, it becomes the most beautiful and long-lasting piece in the kitchen.

Today, the kitchen is a very important social space in the home, and for this reason it has developed to the point of offering the latest design trends. The kitchen tap takes centre stage, seeking to be the star, while being simply contemporary, elegant and sustainable.

3829 stainless steel kitchen tap with tall swivel spout by Ramon Soler®

With this kitchen tap model, Ramon Soler® presents a proposal capable of bringing singularity and a contemporary feel to every corner of the room. Slender and with sinuous lines, this tap convinces with its valuable functional character and captivates with its exceptional quality.

As a kitchen tap made of solid stainless steel, it guarantees us quality and safety. It is a material that is highly resistant to impacts and high temperatures, which makes this tap the best choice for

installations close to heat sources. On the other hand, the non-porous nature of this material prevents the presence of germs, avoids oxidation and makes cleaning easier. At the same time, its antibacterial properties add a very modern professional, industrial touch.

In addition, it has a side-mounted single-lever mixer and a 360° tall swivel spout, which make it a very ergonomic tap.

MATERIAL	Stainless steel

Tall swivel spout

SYSTEMS

HEALTH REQUIREMENTS. Our taps meet the demanding health regulations (ACS France and KTW Germany), which guarantee that the materials in contact with water pose no risk to health.

SENSITIVITY. Our single-lever and thermostatic cartridges allow the desired temperature to be adjusted comfortably, regulating the water mix progressively, without sudden temperature changes. In addition, our thermostatic cartridges react in less than a second to variations in temperature and flow, maintaining the requested temperature.

ERGONOMICS. The ergonomic design of our taps makes them easy for anyone to use.

Solid stainless steel.
