Magnet Kitchen wins the iF DESIGN AWARD 2021

Ramon Soler® has been awarded the prestigious iF DESIGN AWARD 2021 for the second year running, internationally recognised as a seal of excellence in design.

Magnet kitchen by Ramon Soler® has been awarded a DESIGN AWARD 2021, granted by an international jury made up of 98 prestigious experts from the world of design, from more than 20 countries.

The collection of kitchen taps with side single-lever mixer stands out for including an innovative magnet system, which allows the spout to return easily to its initial position when use ends, thanks to the action of an effective neodymium magnet. These magnets are coated in Teflon for a smooth fit and are calibrated magnets. The spout always holds its position thanks to the water hammer effect.

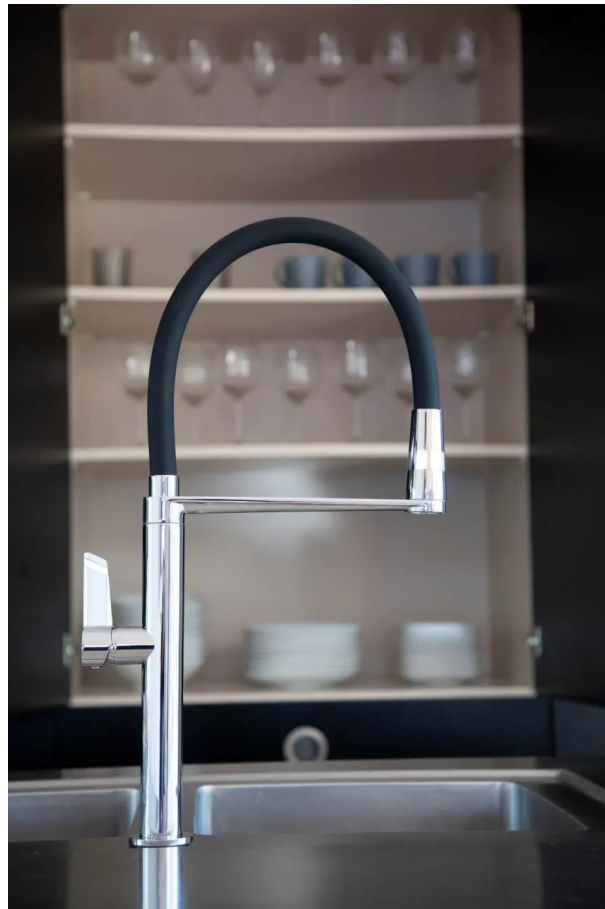

Pull-out kitchen tap with magnet system, Ramon Soler® Magnet Kitchen, winner of the iF DESIGN AWARD 2021

Magnet Kitchen is a designer tap with a clear industrial aesthetic that completes the kitchen and turns the daily routine into a comfortable experience. To enhance the ergonomics and ease of use of the tap, it includes a tall 360° swivel spout, made entirely of black silicone, which gives it maximum flexibility and, together with the pull-out hand spray, makes it ideal for washing both large kitchen utensils and food.

The Magnet Kitchen kitchen taps have been praised for their innovative technology and advanced design. The competition in this edition was very fierce: almost 10,000 entries from 52 countries competed to win the coveted distinction and seal of quality excellence in design. This makes two consecutive iF Design Awards, as Ramon Soler® won the iF Design Award 2020 with its Urban Chic taps and has now been awarded for its innovative Magnet Kitchen kitchen tap in 2021, in the product category for kitchen taps.

The prestigious Barcelona tap manufacturer is celebrating, because it is very important for Ramon Soler® to win the iF Design Award once again, an award with an internationally recognised reputation as a seal of excellence in design.

Pull-out kitchen tap with magnet system by Ramon Soler®

The collection of pull-out kitchen taps with the exclusive and innovative magnet system is available in a high-resistance chrome finish and in new finishes, inspired by global design trends, that give kitchens the essence of sophistication: brushed nickel finish, which brings timeless beauty and a handcrafted look; satin copper, a finish that will not go unnoticed, combining perfectly with the black silicone spout; and matt black, the colour of immaculate elegance. It is important to note that all the finishes of this tap are antibacterial and scratch-resistant, characteristics that make it the ideal tap for handling food and also a very hard-wearing one.

At 67 years old, the iF Design Award has an internationally recognised reputation as a seal of excellence in design and has acted as an expert judge to reward the best projects and products. The iF logo badge is internationally recognised, and the iF DESIGN AWARD counts as one of the best and most highly regarded design awards in the world.

The iF Design Awards cover the following disciplines and categories: Product, Packaging, Communication and Service Design, Architecture and Interior Architecture, Professional Concepts, User Experience (UX) and User Interface (UI).
