Matt black built-in single-lever basin mixer from the Alexia collection

Minimalist elegance

Black is on trend in bathrooms as it is a timeless colour that combines perfectly with any other, representing the elegance and good taste of the most avant-garde interiors. Adding a black detail draws people's attention to that particular point, which exudes pure distinction and invites admiration from anyone who comes into the bathroom.

Matt black wall-mounted concealed single-lever tap from the Alexia collection by Ramon Soler®

Matt black wall-mounted concealed single-lever tap from the Alexia collection by Ramon Soler®

The Ramon Soler® Alexia collection presents its concealed single-lever basin tap, now in matt black, a finish that brings sobriety to the space, winning over the most exclusive bathrooms with its avant-garde design. The matt black tap alongside the bowl-shaped basin forms a subtle set following a monochrome line associated with a minimalist interior. The quality of its finishes is one of the most important aspects for Ramon Soler®, which uses advanced techniques that offer maximum resistance for the daily use of its taps. The matt black finish is excellent thanks to the strength and durability it gains from the electrostatic-on-galvanised technique, which makes the tap an element in constant innovation. The wall-mounted concealed single-lever mixer from the Alexia collection becomes the most practical basin tap, as it gives the space greater functionality, leaving the countertop free and subtly widening the room's field of vision. This tap, with its design of curved, ergonomic lines, creates dynamism with delicate forms and suits both bowl basins and basins integrated into the countertop.

At the same time, it helps to establish a peaceful atmosphere that avoids the overwhelming, creating a calm that is essential for people who want to shed the stress of daily life.

Furthermore, the combination of black with greys, whites and woods creates a visual effect of cleanliness and majesty in the bathroom. This collection is also made up of soft lines that create great comfort for the user. Ramon Soler® brings us a new collection, improved in form and technique, showing that with each design it surpasses itself a little more, making taps that are highly functional and aesthetic and exude unrivalled elegance and style.

SPECIFICATIONS

MANUFACTURER	Industrias Ramon Soler, S.L.
PRODUCT	Concealed single-lever basin tap with 24cm spout, matt black finish
COLLECTION	Alexia
REFERENCE	362103NM

SYSTEMS

Our single-lever taps incorporate an intermediate stop in the vertical travel of the lever, providing a flow with a 50% water saving.

A system that limits the maximum hot water temperature, avoiding the risk of burns as well as excessive hot water consumption. We recommend that the installer limits the maximum temperature by blocking the travel of the lever on single-lever taps and of the handwheel on thermostatic ones. It is a system designed for collective installations such as hotels, care homes, hospitals and residences.

Our single-lever and thermostatic cartridges allow the desired temperature to be adjusted comfortably, regulating the water mix progressively, without sudden temperature changes. In addition, our thermostatic cartridges react in less than a second to variations in temperature and flow, maintaining the requested temperature.
