New kitchen tap in a copper finish

Setting the trend in the kitchen is possible with this tap of avant-garde aesthetics, pure lines and organic forms, dressed in a copper finish that does not go unnoticed.

Ramon Soler®, tap manufacturer since 1890, surprises us once again, incorporating the most groundbreaking details into its new kitchen tap collection. The new kitchen tap it has developed has a semi-professional look and features a side-mounted single-lever mixer and a 360° swivel pull-out tall spout, always made of black silicone, which gives it maximum flexibility, and an innovative magnet system, which allows the spout to return easily to its initial position when use ends, thanks to the action of an effective neodymium magnet. These magnets are coated in Teflon for a smooth fit and are calibrated magnets. The spout always holds its position thanks to the aerator's counterweight.

New kitchen tap in satin copper finish with magnet system by Ramon Soler®

It can now also be found in a spectacular satin copper finish, which combines perfectly with the black colour of the silicone covering the spout.

New kitchen tap with magnet system in satin copper finish by Ramon Soler®

The copper finish, one of the most sought-after trends in the world of design and interior decoration, arriving with the rise of finishes inspired by precious metals, is a strong choice for the most original interior projects, adding to taps and accessories and widening the decorative possibilities of bathrooms and kitchens.

With this kitchen tap model, Ramon Soler® presents a proposal capable of bringing distinction and a contemporary feel to every corner of the kitchen, along with an innovative, high-quality solution with the most sophisticated technology, designed at every point to provide the best user experience. Slender and with pure lines, this tap convinces with its valuable functional character and captivates with its exceptional quality.

It is also the perfect tap for a kitchen island, becoming the star piece, which in addition has antibacterial properties and an anti-corrosion system, is scratch-resistant, offers maximum ergonomics and sensitivity in use by comfortably adjusting the desired temperature, and contains an anti-theft aerator.

FEATURES

MANUFACTURER	Industrias Ramon Soler, S.L.
DESIGN	In-house team
PRODUCT	Sink tap with tall swivel spout, pull-out via magnet system, in satin copper finish.
REFERENCE	386801MACU (38E304205)
MATERIAL	Silicone and PVD finish.
