You can increase the life of the chrome with the Ramon Soler SACRIFICIAL ANODE

The Sacrificial anode is the latest [Ramon Soler®](#) patent. It triples the protection against external corrosion in the chrome plating of the faucets and shower sets. With this patent they are able to protect the faucet surfaces from corrosion, keeping the chrome plating with a radiant shine.

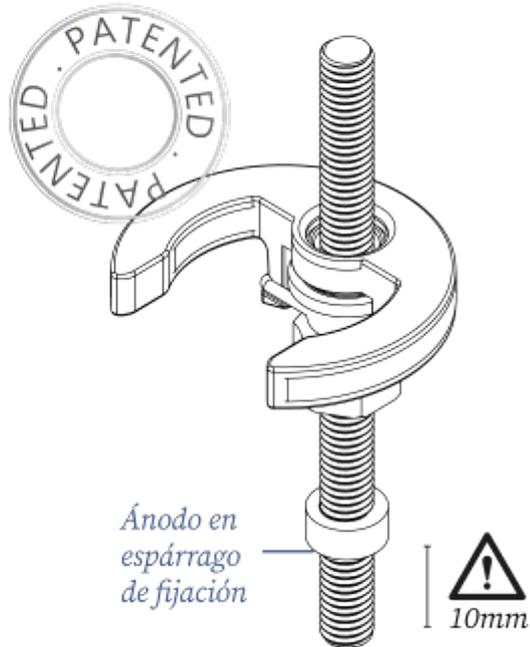

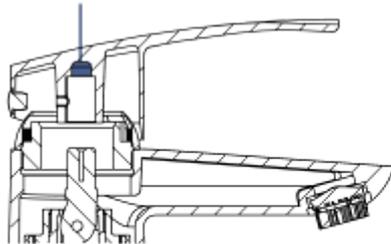

The anode is a piece of zinc - magnesium which is inserted inside the tap to protect it from wear and corrosion, both inside and outside. Ramon Soler has patented this anti-corrosion system and places it in all his series of faucets and shower sets: both in the vertical anchors

and in the wall, likewise its handles are also protected. This solution represents an important advance for the durability of [Ramon Soler®](#) taps.

Ánodo en excéntricas

Ánodo en manetas

They apply this innovative system to handles, eccentrics and fixing studs improving the quality and life of their coatings throughout their taps.

This patent also guarantees the perfect condition of its Diamond Finish.

The results are 600h salt spray (3 times the EU 817 standard).

1. Con ánodo de sacrificio

2. Sin ánodo de sacrificio

Drawing 1, result with zinc-magnesium sacrificial anode on the fixing stud. The rust does not affect the copper in the tap.

Drawing 2, fixation without anode. Under the same oxidation conditions, the body's copper is already beginning to be affected by rust.

The implementation in the production is being carried out progressively during this year 2020.

About Ramon Soler®

Faucet manufacturer based in Barcelona since 1890, with a 16,000 m2 industrial warehouse in San Joan Despí (Barcelona).

Its catalogue offers a wide range of hydrotherapy taps and systems that stand out for being eco-efficient, aesthetic, comfortable and highly reliable products. Ramon Soler® has created faucet models designed for people, seeking not only to create beauty but also comfort and precision in their mechanisms. For a few decades, they have prioritized research to optimize not only water and energy consumption but also the optimization of materials and production processes.

Ramon Soler® has become an international benchmark brand because its products have been certified with the most demanding regulations and its commercial networks extend to 5 continents, in more than 50 countries.
