Ramon Soler® taps with color finishes

Following the latest trends and with the highest quality, the most complete and sophisticated collections of Ramon Soler® design taps are available in brushed gold, brushed nickel and matte black finishes.

[Ramon Soler®](#) constantly works in its R + D + i and quality departments with the aim of creating trends and being able to guarantee the most current aesthetics accompanied by the best quality. Its impeccable design gives bathrooms and kitchens the essence of the most refined luxury.

It currently has the brushed gold, brushed nickel and matt black finishes, which reach its more complete and sophisticated collections of design and avant-garde faucets: **Alexia**, **Tzar** and **Blautherm** recessed shower sets and shower columns. **They will also be implemented in other more exclusive Ramon Soler® design collections and to complete even the last detail, the color finishes are also made in siphons, valves, supports, flexible hoses and hand showers.**

Furthermore, this offer from Ramon Soler® presents kitchen taps with matt black, nickel and satin copper finishes.

Maximum resistance

Both the nickel and the brushed gold of **Ramon Soler®** are extremely resistant, which is essential for daily use. Matte black finish also has maximum durability and strength: **Ramon Soler®'s matte** black finish is ten times better than chrome in the salt spray test. The guarantee of maximum quality is an essential condition for **Ramon Soler®** as well as the design. It is of vital importance for all its customers and especially for hotels, which has specific requirements in terms of both water saving, security and health. Therefore, the firm is clear that a good faucet has to present not only a refined and design aesthetic, but also a set of technical characteristics that make the whole set an ideal piece for residential and hotel projects.

These new finishes, along with chrome plating, are available in the Alexia and Tzar collections and Blautherm recessed shower sets and shower columns, for their maximum comfort and optimization of materials and resources in their installation, with the best aesthetics, quality and technology.

The range of **Ramon Soler®** finishes is so wide that they can be equipped from conventional hotel bathrooms to luxury hotel bathrooms. With these new finishes of the latest trend, the firm offers from recessed taps for washbasin, different heights of single lever washbasin , standing columns for washbasin and bath, to sets with large circular and square shower heads for shower and bath.

The matte black finish of the Ramon Soler® taps has extreme durability and maximum resistance: in the salt spray test it is ten times better than chrome.

Alexia, Tzar and Blautherm, the collections that use the new finishes for the first time, inspired by the latest trends

The **Alexia** collection by **Ramon Soler®** is presented in four heights to coordinate with all types of washbasins. We had already fallen in love with its exquisite design, but it conquers us again with its new finishes. Its design, inspired by conical and ergonomic shapes, achieves a delicate and at the same time vertiginous effect, with a conical spouts that ends with a handle with soft and minimalist lines. The volumes of the tap and the set of dimensions of its shape make Alexia a tap with an ideal harmony, achieving total comfort for the user.

Tzar, a collection available in three different heights, combines a silhouette made up of a conical body and a reverse handle, with a narrow base and widening in the central part of the body of the tap, which gives it a contemporary and selective style, together with a large spout, designed for maximum user comfort in terms of ergonomics

Blautherm kits are shower sets designed for maximum comfort and optimization of materials and resources in their installation. It includes shower columns and an interesting variety of thermostatic recessed sets and single lever.

These are the collections that use the new finishes for the first time, inspired by the latest global trends in top quality design that give bathrooms and kitchens the essence of the most refined luxury: brushed Gold finish of pure sophistication. Combined with washbasins or baths with simple lines, it manages to create a bright, elegant and stylish set. Brushed nickel, defined by its timeless beauty and handcrafted appearance. Finally, the firm has not neglected the color of elegance: matte black.

Matte black stands out among color finishes

The firm has not neglected the color of elegance: matte black. The trends in architecture and interior design focus again on the color black, which never goes out of fashion and is now an essential in the most current bathrooms. Black is the color that has always been associated with elegance, sobriety, a luxury that is not ostentatious and maximum sophistication. Now in a matte finish it is the latest trend in the most avant-garde bathrooms.

[The firm](#) offers an excellent matte black finish, thanks to its contribution in resistance and durability with the electrostatic technique on galvanized, which makes the faucet a highly resistant element.
